

AETHER AI CHAT

Individual Instructions · Zaid

UX + Backend Developer · UX-Backend-Employee Owner

ASK → COMPARE → VERIFY

Smart for beginners · Powerful for professionals, developers & researchers

24 AUG 2026 — 12 SEP 2026
15 working days · 8 hours/day
Reports only to: Azharuddin

Role & Ownership

YOUR MISSION

Own the complete UX-Backend-Employee package and build the product experience + backend required to make Aether AI fully match the PDF vision: ASK → COMPARE → VERIFY.

STRICT BOUNDARY

Work only inside UX-Backend-Employee. Do not modify UI-Employee files. Import UI components from that package only.

Package Structure

```
UX-Backend-Employee/  
■■■ src/  
■ ■■■ components/ux/ ← AetherWorkspace and related UX components  
■ ■■■ hooks/  
■ ■■■ integrations/  
■ ■■■ lib/ ← chat logic, models, persistence, stream, etc.  
■ ■■■ routes/ ← All routes (pages + api)  
■ ■■■ router.tsx  
■ ■■■ routeTree.gen.ts  
■ ■■■ server.ts  
■ ■■■ start.ts  
■■■ supabase/  
■■■ .env
```

CORE DIFFERENTIATOR

Compare + Verify are the real differentiators of Aether AI. Build them carefully, reliably and with production-quality architecture.

Zaid's 15-Day UX + Backend Execution Plan

WEEK 1		Foundation + ASK Experience
DAY 1	Mon 24 Aug · Foundation + Technical Specification	
Focus & Tasks • Thoroughly study the PDF document. • Map the current codebase against required Compare, Verify, Recommendation and Files features. • Write a clear technical specification and share it with Azharuddin by end of day.		
Deliverable: Approved technical specification and feature/codebase map.		
DAY 2	Tue 25 Aug · Core Chat Architecture	
Focus & Tasks • Strengthen message structure, threading and streaming foundation. • Design solid data models for Compare sessions. • Design solid data models for Verify reviews.		
Deliverable: Stable chat foundation plus reviewed Compare/Verify data models.		
DAY 3	Wed 26 Aug · ASK + Smart Recommendation	
Focus & Tasks • Implement basic smart model recommendation logic. • Improve the main ASK flow inside AetherWorkspace.		
Deliverable: Working recommendation path and improved ASK flow.		
DAY 4	Thu 27 Aug · ASK Completion	
Focus & Tasks • Complete the basic recommendation engine. • Improve conversation continuity and persistence. • Run end-to-end testing of the improved ASK experience.		
Deliverable: Reliable ASK experience with persistence and recommendation.		
WEEK 2		COMPARE Mode
DAY 5	Fri 28 Aug · COMPARE Backend Foundation	
Focus & Tasks • Design and implement backend structure for multi-model comparison sessions. • Prepare required APIs and data handling for Compare Mode.		
Deliverable: Compare session model and integration-ready APIs.		
DAY 6	Mon 1 Sep · COMPARE Core Logic	
Focus & Tasks • Send the same prompt to multiple models. • Store structured comparison results properly.		
Deliverable: Core multi-model comparison execution and persistence.		

DAY 7	Tue 2 Sep · COMPARE Integration
Focus & Tasks - Fully integrate Compare Mode with UI components. - Allow users to start a comparison from any existing answer.	
Deliverable: End-to-end Compare initiation and UI/backend integration.	
DAY 8	Wed 3 Sep · COMPARE Reliability
Focus & Tasks - Complete testing, edge cases and performance work. - Ensure streaming multiple models works reliably. - Fix Compare bugs and stability issues.	
Deliverable: Reliable, performant Compare Mode under realistic conditions.	
WEEK 3	VERIFY Mode + Files
DAY 9	Thu 4 Sep · VERIFY Backend Foundation
Focus & Tasks - Design data structure and backend logic for independent verification. - Prepare the flow: take one answer and send it to another model for review.	
Deliverable: Verify review model and backend verification flow.	
DAY 10	Fri 5 Sep · VERIFY Core Flow
Focus & Tasks - Implement the full Verify flow. - Connect Verify with previous answers and Compare results.	
Deliverable: Integration-ready Verify flow connected to existing context.	
DAY 11	Mon 8 Sep · VERIFY Completion
Focus & Tasks - Complete Verify Mode end-to-end. - Run full flow testing: ASK → COMPARE → VERIFY.	
Deliverable: Working end-to-end product flow across all three modes.	
DAY 12	Tue 9 Sep · Files + Analysis
Focus & Tasks - Implement file upload and storage. - Implement file analysis: summarize, extract information and ask questions on files.	
Deliverable: Working file upload, persistence and analysis experience.	
FINAL STRETCH	Conversation, Hardening + Production

DAY 13**Wed 10 Sep** · Conversation + Beginner Guidance**Focus & Tasks**

- Strengthen conversation organization and history.
- Improve beginner recommendation paths.
- Improve overall guidance logic.

Deliverable: Organized conversation experience and stronger beginner path.**DAY 14****Thu 11 Sep** · System Hardening**Focus & Tasks**

- Full system testing of all flows.
- Improve performance and error handling.
- Strengthen streaming reliability.
- Test and fix edge cases.

Deliverable: Stable system with production-grade error and performance handling.**DAY 15****Fri 12 Sep** · Production Readiness + Handover**Focus & Tasks**

- Complete final backend cleanup and production readiness.
- Fix all points from Azharuddin's final review.
- Support joint testing and handover.
- Target 6–7 focused hours.

Deliverable: Clean, stable, production-ready UX-Backend-Employee package.

Mandatory Daily Rules

01	10:00 AM update Send today's plan.
02	7:00 PM update Send completed work plus blockers.
03	Daily push Push code at the end of every day.
04	Working state Keep the application working every day; no broken main flows.
05	Discuss architecture Any new data structure, API shape or major UX decision must be discussed with Azharuddin first.
06	Engineering quality Prioritize clean architecture, proper TypeScript and good error handling.
07	Mobile parity Mobile experience for the flows you build is equally important.
08	Escalate blockers If blocked or unsure, message Azharuddin immediately. Do not wait or assume.

Success Criteria · 12 September

01	Solid and reliable ASK experience with smart model recommendation.
02	Fully working Compare Mode with multiple models and clear structured results.
03	Fully working Verify Mode with independent review of any answer.
04	Proper file upload and analysis.
05	Good conversation continuity and organization.
06	Clean architecture and stable performance.
07	Smooth end-to-end flow: ASK → COMPARE → VERIFY.

FINAL DIRECTION FROM AZHARUDDIN

We are building the real differentiator of Aether AI: **Compare + Verify**. Work carefully and with high quality.

Official work begins: 24 August 2026.
